Subject: RE: November 15th EPA meeting questions - please respond
Date: Monday, February 25, 2013 11:52:02 AM

Hi Richard-

Appreciate it. FYI that I do have that document and have linked to it from question #15 in our [January 24th meeting FAQs](#).

However, for the Nov. 15th EPA Public Meeting FAQs, the question for which I need an answer is the following:

5. Why does TDHS allow more dioxin (1000 per trillion) than other states for residential exposure?

Also, there is another question that I think we have answered sufficiently but has and will spur follow up questions about epidemiological studies, cancer clusters, risks from non-SJRW polluters, etc. Not sure if you want to address those follow up questions in written form in FAQs, but I am sure the public will be grateful if you could do so. The original question is:

9. Is the health department determining the immediate risk of residents from drinking the water, consuming fish, and from direct exposure of dioxin from swimming, fishing, etc. in the immediate Highlands community?

Thanks-
Scott

Subject: November 15th EPA meeting questions - please respond
Importance: High

Hello EPA and TDSHS Folks-

Could y'all take a look at the highlighted portions of the answers that we drafted to answer the questions asked at the November 15th EPA public meeting and fill in the blanks for these two questions for us? If you had any edits for the other answers, we'd welcome the feedback on them as well.

We'd like to post these on our GBF website the week of February 25th.

Thanks-
Scott
